### Today's Thought

Be not envious; envy makes  
moral progress impossible.

—Anvaray.

### Board of Trade

The monthly meeting of the  
Board was held in the Oliver  
Cafe Wednesday evening, May 27.

Unfortunately for the fare pro-  
vided, both for body and mind,  
was far from complimentary judg-  
ing by the attendance. To you  
members who were absent, we sim-  
ply say, if you had known before  
hand what we, who attended, knew  
at the close of the meeting, the  
capacity of the Oliver Cafe would  
have been overtaxed.

Mr. H. Riley, of Calgary, was the  
speaker, and took as his topic Econ-  
omic Nationalism, and during the  
course of his address traced its  
working from the dim past ages to  
the present day, amplifying that old  
wise saying of Robert Burns, its got  
to come, and it is coming, "That  
Man to Man the World over will  
Brothers be for a that."

Possessing a splendid delivery,  
backed with fire and vigour, Mr.  
Riley held his audience deeply eng-  
rossed from start to finish, leaving  
many a thought for those of us  
there, to ponder over.

Mr. Gish moved the vote of  
thanks at the close of the address.

Mr. J. Thomson, of the Canadian  
National Institute of the Blind, was  
also present and made an appeal on  
behalf of the work being carried out  
by this body in Alberta.

Rising to the occasion Mr. C. H.  
McMillan stated in reply, that the  
Board was handicapped owing to a  
scanty treasury, but felt that those  
present would contribute there and then.  
No sooner said than done and in the twinkling of an eye a col-  
lection amounting to \$13.35 was  
subscribed to this worthy cause.

T. Tredaway, 2nd Vice-President,  
occupied the chair in the absence of  
President McCool who was indis-  
posed.

### Zyzzle

Just suppose you wanted to find  
the word zyzzle in the dictionary.  
Would you start at the first page,  
leaf through the entire book and  
come finally to the last word, on  
the last page? That, you say,  
would be an insane waste of time.

Now, suppose you need accessories  
for house cleaning. Suppose  
you need soap, or floor wax, or a  
pail and mop. Or let's go further,  
a dainty roast, or something in the  
meat line.

Yes, or maybe your radio has  
stopped functioning, or your lights  
have fused. Our stores are featur-  
ing real bargains in household needs  
at this time. Other firms display  
ads for your convenience for other  
lines. Yet you waste time and  
effort, if you walk from store to  
store, wander from counter to  
counter looking for what you want  
to buy at the price you want to pay.

Instead, you may sit comfortably  
at home and learn where and when  
to make the best buys. That's all  
printed for you in the advertisements  
of this paper. You have only to read them and heed them  
to save time, save tiresome shopping,  
and save money. In time of  
trouble if you have been a constant  
reader of our ads you will know  
immediately who to call and where.

### J. M. WILLIAMS Local Businessman Seeks Pastures New

After twelve years of business in  
this locality, Jim Williams, local  
blacksmith, has sold his business  
interests and shop to one, J. M.  
Larson, of Bentley, Alberta. The  
change in ownership to take effect  
immediately.

For the time being J. M. will con-  
tinue to represent the Massey Har-  
ris Company.

Jim has been a prominent figure  
in business and other activities in  
our community during his residence  
here, and for a period of 8 years  
was mayor of the Village, a past  
Grand Master of the local lodge of  
the A.F. and A.M., past president  
of the local Curling Club, and also  
a good worker in the Board of  
Trade having been on many of the  
Committees, and also Chairman in  
1934 of the Public affairs, he has  
given of his time and energy in  
helping things along.

At the present time Jim has no  
plans for the future, but will, after  
the school term, take a well-earned  
vacation at the coast with his fam-  
ily.

The community will miss Mr.  
Williams and family, and they can  
rest assured that they carry with  
them the best wishes of their many  
friends for success and good health  
in the future.

### Mrs. H. T. Stewart

Rosella Stewart, beloved wife of  
H. T. Stewart, passed away peacefully  
at her home east of Crossfield  
on Thursday morning. She leaves to  
mourn her passing, her husband  
and a large family.

Funeral arrangements will be  
undertaken by Guy Armstrong Ltd.  
of Calgary.

### Irene E. Wearmouth

Irene Elizabeth Wearmouth, 16  
years of age, daughter of Mr. and  
Mrs. J. C. Wearmouth, Wessex,  
died in a Calgary hospital Tuesday  
morning following a brief illness.  
Born in Cochrane, she received her  
public and high school education at  
Wessex.

Surviving are her parents; four  
sisters, Eleanor, Peggy, Doris and  
Jean, and five brothers, Stoddard,  
Kenneth, Frank, Roy and Donald,  
all at home. Funeral services were  
conducted by Rev. W. H. Morgan  
at Jacques funeral home Tuesday  
afternoon at 3:30 o'clock. Inter-  
ment followed in Burnsland ceme-  
tory.

The proper feeding of poultry  
at all stages of development is  
discussed in the bulletins "Breeding  
and Rearing of Chicks" and "Poul-  
try Feeds and Feeding," which will  
be forwarded by the Publicity &  
Extension Branch, Department of  
Agriculture, Ottawa, on request.

### Census of the Prairie Provinces

The quinquennial census of the  
three Prairie Provinces, - Manitoba,  
Saskatchewan and Alberta, -  
will be taken on Monday, June 1.  
The Dominion Bureau of Statistics  
points out that it is especially im-  
portant at the present time that a  
complete and accurate inventory  
be obtained.

There are twelve inquiries which  
deal with the occupation, indus-  
try, the industrial status, unem-  
ployment, employment and earnings  
of the gainfully occupied  
population. It is hoped that every  
question will be answered fully  
and it should be noted that there  
need be no fear that information  
given will be available to anyone.  
The utmost secrecy is preserved  
and in no circumstances will any  
information supplied by individuals  
be used as a basis for taxation  
or for any other purpose. All officials  
and clerks are bound by an  
oath of secrecy.

In addition to the questions  
dealing with occupation, industry  
and status, certain inquiries relat-  
ing to unemployment, employment  
and earnings will be addressed to  
all persons reported as wage or  
salaried workers. Persons not at  
work on June 1 will further report  
the reason and the number of  
weeks since last employed. Those  
with jobs will be asked whether  
employed on full or part time basis  
or on relief work and the number  
of weeks worked during the last  
two months. Every wage earner  
will be expected to state the total  
amount of his earnings during the  
past twelve months.

Not only will the Census give  
a comprehensive picture of the  
occupational scene on June 1 but it  
will describe its more permanent  
features as well. The Census will  
tell for every community what its  
members were doing for a living on  
June 1 and also what they usually do.  
Such information is useful in  
formulating a policy of re-employment  
and placing.

Much interest and concern exists  
today as to the number of unem-  
ployed in the country, distinct  
from those in receipt of relief.  
Unemployment in depressed indus-  
tries, as well as in the various  
grades of occupation, will be fully  
understood from the facts gathered  
at the Census. The light the  
Census will throw on the duration  
of unemployment in the Prairie  
Provinces as well as the extent part  
time employment will be very use-  
ful in framing remedial measures  
to meet the situation.

It is recognized today that young  
people represent a special problem.  
Young persons who have now  
come into the labor market as com-  
petitors for available jobs will re-  
ceive special attention. It is pro-  
posed to record them separately  
from the unemployed who have  
followed an occupation at some  
time prior to the census and to  
find out how many have been  
trained to fill a number of clerical,  
technical and professional occupa-  
tions.

Statistics of earnings of wage  
earners are in increasing demand.  
The knowledge will be useful in  
gauging the relative need of differ-  
ent economic groups and for set-  
ting up uniform wage standards in  
each province or in specific locali-  
ties within each province.

### Protection Of Wild Life

Not any too soon, an awakened interest in conservation of wild life and particularly game birds and animals, fur-bearing animals and fish is noted on both sides of the international boundary. This renaissance, if it can be called such, is most timely in view of the probable early extinction of many important and indeed valuable animals and birds if present wasteful methods are to be allowed to continue very much longer.

It is true that governments on both sides of the line have entered into agreements for the protection of some of the best known game birds and a good many regulations have been adopted by state and provincial governments for internal protection of a much wider range of both birds and animals of economic value to mankind, but that alone is not sufficient to ensure perpetuation of a great heritage.

True conservation cannot be attained until the great majority of the farmers in the country and sportsmen in the cities, towns and villages constitute themselves unofficial game guardians and use their utmost endeavors to protect harmless wild life both by example and precept.

Many thousands of men in the prairie provinces are already doing this, but maximum results cannot be achieved until practically everybody is imbued with the necessity of conserving one of the greatest gifts of Nature to ourselves.

Both in the United States and Canada lovers of the great outdoors have become thoroughly alarmed at the decimation which has taken place in recent years in the flocks of game birds, both those that inhabit the uplands and those which migrate twice a year from the one country to the other. A similar apprehension at the rapid diminution of herds and flocks of wild game animals is being frequently voiced, and not without justification, in magazines and newspaper articles both north and south of the 49th parallel.

In the United States, where misplaced governmental activities have resulted in large scale destruction of breeding grounds and natural sanctuaries under the name of rehabilitation, sportsmen and conservationists are mooting the advisability of linking up all societies interested in the preservation of wild life in protest to the Federal government and to demand more rigid regulations and restrictions in the interest of fur feather and hide, not alone for economic reasons but also from the viewpoint of the necessity for preserving the aesthetic features of the countryside.

It is good to note that this awakening desire to conserve the game birds and animals is being extended to include the song birds, for their importance in the balance of nature is becoming more and more recognized. This was a time when the destruction of song birds was passed over as a matter of little or no moment, except by a few bird lovers.

This sympathy towards the wifful destruction of the feathered songsters of woodland and open prairie is fortunately passing and to-day they are generally regarded as friends of man which should be protected. The majority of them is now more widely recognized are the foes of insect pests which, if left to multiply without let or hindrance, would in a very short space of time render the world uninhabitable.

To-day not only are people generally refraining from killing song birds and are restraining youth from giving vent to a lust to kill, but are taking more active steps to protect their feathered friends from such natural foes as the crow and the magpie.

In all three provinces there are clubs in operation, formed with the destruction of the crow as the objective of the membership. While differences of opinion as to the menace of the crow have been voiced from time to time, the weight of evidence in the indictment of this bird as an adversary of the insectivorous song birds is overwhelming. One witness for the prosecution, Dr. H. G. Carson of Saskatoon, found that 53 per cent of the crow nestlings examined by him on behalf of the Fish and Game League last year were 100 per cent free from crows taken from their nests and that examination of more than 300 crows shot during the season by members of the league showed that 28 per cent of the adult crows had eaten birds or eggs in the height of the nesting season.

In the light of this evidence the recently announced sweepstakes competition by the Saskatchewan Government aimed at the destruction of crows and magpies is regarded as a distinct forward movement in the program of preservation of songsters and game birds, and apart from the monetary reward offered for killing banded crows will doubtless be heralded with general approval by Nature lovers.

### Crossing Wheat With Rye

Experiments in crossing Chinese wheat and rye to obtain a plant combining hardness of rye and milling qualities of wheat are being conducted by the University of Saskatchewan. Plants obtained from the crossing process are claimed to retain some of the qualities of rye. The cross between the two grains is easily made, but results are not always constant.

### Building Larger Zeppelin

Work has begun at Friedrichshaven on another Zeppelin—bigger and faster than the Hindenburg which flew across the South Atlantic with 50 passengers and a crew of 40. The new Zeppelin will be almost as long as the ocean liner Queen Mary, will carry 80 passengers, and will average nearly 100 m.p.h. on long journeys.

Red has been made the color of the German post service, all mail boxes, trucks, collecting vehicles, and buses used being painted cadmium red.

In Canada it is unlawful to advertise a "cure" for obesity.

### Mining In Northern Area

#### Large Development Program For Northwest Territories This Year

As a result of the geological field program carried out by the Department of Mines last year, great activity in prospecting and mining development will be seen in the Northwest Territories during 1938. The Mining Recorders of the Department of the Interior at Cameron Bay, on Great Bear Lake, and Fort Smith, which lies just north of the Arctic Circle, and the various boundary, report that while development work has continued on the older or main properties, preparations are being made by numerous interests for the carrying out of an extensive prospecting program this summer.

Prospecting activities will be chiefly centred in the Yellowknife area, also on the north and south shores of the east arm of Great Slave Lake including the islands. At least five major mining companies will have prospecting parties in this field and indications are that many individual parties will also prospect the area. As part of last year's geological field program 10,000 square miles were examined north of the northwest and east arms of Great Slave Lake, and the geological formation of approximately one-third of this area, which forms the southern part of the yellowknife Game Preserve, was found to be favourable prospecting ground for precious metals.

### Prefers Life In Alberta

#### 93-Year-Old Woman Does Not Like California

Although Mrs. H. M. Olsen is 93 years old, she would rather live on her wheat farm near High River in Alberta, operated by one of her sons, than live in the fruit-growing lands of Arizona where she once resided, or with her two sons now living in California.

"Grandma" Olsen showed little patience for people living in fruitlands. "What is fruit?" she asked. "It comes and goes, it doesn't last. It is wheat that is lasting. Wheat—bread to feed the world. I have always been glad I came to Alberta. It grows wheat."

Mrs. Olsen left her native Denmark in 1883, crossed to Salt Lake City immediately after her arrival in New York, and soon after was married to Mr. Olsen. She came to Alberta in 1905.

"I walked every step of the 1,100 miles between Omaha, Nebraska, and Salt Lake City behind a covered wagon," she declared.

### Must Be Almost Perfect

#### Record Of American Cow Something To Marvel At

Honor is being paid to an American cow which has produced 38,606 pounds of milk containing 1,402 pounds of butterfat in one year. Figures have been compiled to show that this is equal to the milk consumption of more than 200 people in one day every day of the year, enough milk and cream to make 88,860 ice cream cones, and enough butter for eight families every day, provided they are not on relief rations.

Very interesting. This record will be cited as a mark for other cows to shoot at; the sort of cows that every dairy farmer should aspire to have in his herd. Nineteen tons of milk containing more than 3.6 per cent butterfat! We call it cow-operation!—Stratford Beacon-Herald.

### Many Tourists Expected

#### Peak Of 1929 Looked For By Travel Agent

Tourist travel into Canada this year would reach the peak established in 1929, D. L. Dolan, director of the Canadian Travel Bureau, predicted at Ottawa in an address at a banquet of the northern division of the Ancient Mystic Order of Samarians.

"To date we have received

practically twice as many inquiries as we had at this time last year," he said. "Most of the inquiries are from United States citizens wishing to visit our country."

### Maybe This Kind

An English motorist who owns one of those small cars which every body makes jokes about was recounting an experience to a friend.

"I had a bit of bad luck coming up from Brighton the other day," he said. "I ran into a trap."

"Is that so?" said his friend. "Any cheese in it?"

In 1931, there was one automobile to every 56 persons in the world.

In 1830, approximately 1,400 mail coaches left London daily.

### Value Of Advertising

#### A Greater Force In Business To-Day Than Ever Before

Advertising to-day is a greater force in business than ever before. Those who have made a study of it, who have used it regularly, regard it as most important to the product itself. The most effective article will remain on a merchant's shelves unless potential buyers are told about it.

A forward to the 1938 edition

of the McKim Directory of Canadian Publications, the agency whose name it bears makes some interesting observations on the value of advertising. These are the result of its long experience in this field of commercial activity. Commenting on the fact that an "easy-spending era" is not likely to return for many years, the forward continues:

Actually, advertising to-day has a greater opportunity than it ever had. The continued emphasis on distribution, together with curtailment of unfair practices which served as short cuts to distribution—the growing insistence on standards in every class of merchandise—the public demand for evidence of value—the appearance of products embodying scientific advances and claims for exposition—the importance to many industries of a more sympathetic and understanding public—these are some phases of the opportunity that awaits advertising to-day.

But to influence effectively the consumer in 1938, advertising must be soundly conceived and seriously planned. People won't buy simply because the form of the advertising intrigues or entertains. There must be the sincerity which produces conviction, as well as the emotional presentation that arouses desire.

Successful advertising is not a "now and then" affair. It has to be constant and it must be done well. It is one thing to create a demand and quite another to sustain that demand. This is where consistency in advertising pays large dividends.

Finally, successful advertising requires that the purchaser be given his money's worth. Honesty, sincerity and persistency are three keys to the buyer's pocketbook.—Edmonton Journal.

### May Visit Vimy

#### King Edward Expected To Attend Unveiling Of Canada's Memorial

The Havana News Agency said it was authoritatively informed King Edward would go to France July 26 to attend the unveiling at Vimy of the giant memorial to Canada's war dead.

The Agency said His Majesty would travel by airplane and that the occasion is regarded in Paris as a significant gesture of Anglo-French friendship.

King Edward is expected to land at Vimy from London on the morning of July 23 and to return home on the same day, en route to these provinces. President Albert Lévesque, Marshal Henri Petain, commander of France's Great War armies on the western front, and the new French premier will greet His Majesty, the Agency said.

The possibility the king would attend the unveiling of the Vimy Ridge war memorial, July 26, was being discussed in several quarters in London, although no official announcement has yet been made.

The king's presence would give him an opportunity of greeting nearly 10,000 of his Canadian subjects, and many of the soldiers with whom he served in France. It would also constitute his first journey abroad since his accession.

### Tribute To Famous Poem

#### Peak Of 1929 Looked For By Travel Agent

English Earl Showed His Appreciation Of Spenser's Work

When Spenser had completed his most famous poem, "Faerie Queen," he took it to the Earl of Southampton, patron of the works of that day. The Earl received the manuscript, read a few pages, and then ordered a servant to deliver it to be waiting author.

Reading on, he cried in rapture,

"Carry the man another 20."

Proceeding still further into the fascinating work, he ordered still another 20 to be delivered.

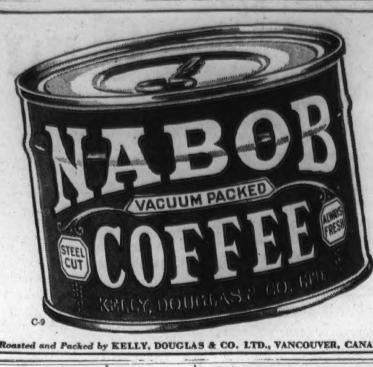

But at length he lost all patience and exclaimed: "Go turn all that fellow out of the house. If I read further I shall be ruined!"—Christian Science Monitor.

### Indian Building Divided

Lightning recently split a two-story wooden building into two parts from roof to cellar on the Indian reservation at Caughnawaga, Que. Reporting the strange accident, Police Chief John Jocks said the damage was estimated at \$500 but no one was occupying the house at the time.

THE CHRONICLE. CROSSLFIELD, ALTA.

### New Lifeboat Invented

#### Can Be Sealed And Has Device For Renewing Air Supply

Victims of future marine catastrophes will find themselves comfortably saved within a sealed, non-sinkable lifeboat, if the invention of a reputable Catalan engineer proves practical.

The new lifeboat that cannot sink is capable of saving 40 to 50 persons. It can be launched from a sinking ship under all weather conditions and in less time than is required to remove the canvas from an ordinary lifeboat.

But to influence effectively the consumer in 1938, advertising must be soundly conceived and seriously planned. People won't buy simply because the form of the advertising intrigues or entertains. There must be the sincerity which produces conviction, as well as the emotional presentation that arouses desire.

Successful advertising is not a "now and then" affair. It has to be constant and it must be done well.

It is one thing to create a demand and quite another to sustain that demand. This is where consistency in advertising pays large dividends.

Finally, successful advertising requires that the purchaser be given his money's worth. Honesty, sincerity and persistency are three keys to the buyer's pocketbook.

The machinery for lowering the lifeboat after it has been occupied has been perfected by the same inventor.

According to Salomo Vila and to witnesses who have seen tests made off the coast and near the town of Mataro, the lifeboat can be lowered in all kinds of weather and it is absolutely non-sinkable. These tests add that the interior of the vessel remained perfectly dry during violent storms and that the air was renewed without admitting any water.

### Thieves Return Stolen Goods

#### To Keep Police Of Roumanian Town From Losing Jobs

The threat of the Roumanian government to fire the whole police force of the town of Buzau, Romania, for incapacity to make the hearts of a dozen gangsters stop beating, has been sent by post to the chief of police big parcel with stolen goods, accompanied by a letter stating that "We, the thieves of Buzau, do not want the poor police to lose their jobs and shall consequently transfer our activities to other parts of the country. Our principle is 'live and let live.'

The complaint of a member of parliament, M. Moceanu, whose elephant gun for coat was stolen in Buzau, caused the ministry of interior to announce that if the coat was not found within 24 hours, the whole police force, including the chief, would be dismissed. Next morning, a huge parcel containing among other things, the fur coat of the member of parliament arrived at police headquarters.

### Takes Over New Post

#### Earl Of Willingdon Appointed Warden Of Cinque Ports

The Earl of Willingdon has been appointed Warden of Cinque Ports, a position of considerable dignity, carrying comfortable emoluments and residence at Dover Castle.

Lord Willingdon returned from India after five years as viceroy and it was announced the king had conferred a Marquessate on him.

As Warden of Cinque Ports, the former governor-general of Canada succeeds the late Marquess of Reading, himself a former viceroy of India.

The Cinque Ports—originally Hastings, Romney, Hythe, Dover and Sandwich but now including other "ancient towns" of the south coast of England—are a league enjoying a number of ancient privileges.

### Expensive Fuel

Coal is worth almost its weight in gold at Aklaivik, N.W.T., and is almost as scarce. Most of this sub-Arctic outpost's coal supplies are brought in by airplane, and traders and trappers pay "sky-high" prices for it.

Seeking new uses for French resinous products, France is trying resin as a road surfacing material.

The first farm plows were made from crooked tree branches and worked entirely by man power.

Every boy and baseball fan who wants this up-to-date book on baseball should get it to play it by, Frank J. (Shag) Shaughnessy, Manager of the pennant winning Montreal Royals.

Pitching, batting, base running, all the fine points of the game are clearly explained and illustrated. Here's how to get it. Simply send in the address of the store where you buy it, or "LILY WHITE" Corn Syrup label with your name and address and the words "Send me 'Book on Baseball'" plainly written on the back and your copy will be mailed to you right away.

THE CHRONICLE. CROSSLFIELD, ALTA.

## CHURCHILL WARNS THAT ALL EUROPE IS RE-ARMING

London.—The House of Commons turned to foreign affairs again, Prime Minister Baldwin warning Italy that any interference on its part in Egypt and Palestine "will be considered as an unfriendly act and treated accordingly."

Sir Thomas Inskip, minister for defence co-ordination, outlined the steps being taken by the government to prepare the war industries for any emergency, while Winston Churchill made his usual powerful contribution to the debate.

A Liberal motion to reduce the appropriation for the defence co-ordination ministry was defeated, 207 to 115.

"Under no circumstances," the prime minister declared, "will interference on Italy's part with the existing regime in Egypt and Palestine be permitted. His Majesty's government have made it clear in unmistakable terms that they would regard as an unfriendly act any attempt at interference in the affairs of the Territory of Egypt, as an attempt to be repelled by all the means at their command."

Mr. Baldwin said the government, in consultation with Egypt, was considering the defence of the Suez canal "in view of the changed conditions caused by developments in the air."

"Presidential conversations are at present being held with Cairo with view to negotiation of a treaty of alliance between this country and Egypt, and questions concerned with the protection of the canal are being taken into account," the prime minister said.

Churchill warned that "all Europe is rearming and preparing its whole industry for war."

At the other end of the world, he said, "Japan is arming and is in the highest state of national exultation. All the old perils of one year ago are presented in aggravated form."

"The only new and prime factor is the grave antagonism that has grown up between us and Italy. And where will the others be if you are later taken into account the strength of the German army and air force in 1936 and 1939, for broadly speaking, the effective result of your work only matures in the third year?"

"The British public has no idea of the efficiency of German war production, of its enormous skill, nor with what marvellous smoothness it could be made to pour out an almost limitless flow of the most horrible weapons of human destruction ever placed in the unworthy hands of men."

### Simple Funeral For Allenby

#### Ashes Placed In Warrior's Chapel At Westminster Abbey

London.—Ashes of Viscount Allenby, of Megiddo and Felizion, were placed with due ceremony in the warrior's chapel at Westminster Abbey. The body of the great field-marshall, who led British troops in a spectacular and victorious campaign against the Turks in Palestine during the Great War, was cremated at Golders Green.

In accordance with Allenby's own retiring nature, there was no pomp and ceremony procession through London's streets to the abbey. Instead the casket containing the ashes was taken to the final resting-place in a simple barge.

The king was represented by Field-Marshal Sir Philip Chetwode, and by his brothers, the Dukes of York, Gloucester and Kent. The Duke of Connaught, great-uncle of the king and a former Governor-General of Canada, was also represented.

The funeral service was conducted by Dr. Foxley Norris, Dean of Westminster. At the close, the "Last Post" and the "Reveille" were sounded by buglers in the dean's yard.

#### Develop Tourist Traffic

North Bay, Ont.—Ontario could develop a \$200,000,000 a year tourist traffic from the United States into the gold-producing northern areas if a good road were built from the south to the north of the province, said G. G. McGeer, mayor of Vancouver and M.P. for Vancouver-Burrard, on his return from a trip to Kirkland Lake.

#### Death Penalty For Smugglers

Montreal.—Drastic regulations in an attempt to curb large-scale smuggling into North China, twice subject of protests from the Chinese government to Japan have been announced. One measure provide the death penalty for six classes of violators.

## Union Proposal

### U.S. Representative Suggests Union Between Canada And States

Washington.—A union between the United States and Canada was proposed by Representative Sirovich (D., N.Y.), in a resolution providing for a joint senate and house of representatives committee of 10 to hold hearings on the plan with a similar Canadian group.

Sirovich noted both countries would derive great benefits from the union, naming among others solution of the unemployment problem, mutual use of ports and highways, elimination of tariffs, availability of United States capital for Canadian development, and greater strength in defence against any common enemy.

The committee Sirovich proposed would seek to determine the wisdom of the union, under which Newfoundland would enter the union under the same status as the United States and Canada and Newfoundland citizens would become "American citizens with all the privileges of citizens of the United States of America."

Sirovich said the two countries together "would become the greatest English speaking nation in the world, covering the greatest amount of contiguous territory, with vast areas waiting for development." His resolution would authorize \$25,000 for the congressional committee.

He said that in any dealing with Canada, her dominion status must be borne in mind, but explained that the 1931 statute of Westminster provided "that the parliament of a dominion has full power to make laws having extra-territorial operation."

### Cut Bank Interest Rates

#### Canadian Bankers' Association Announces Change Effective June 1

Toronto.—S. H. Logan, general manager of the Canadian Bank of Commerce and president of the Canadian Bankers' Association, has announced on behalf of the association a reduction of one-half of one per cent. in the rate of interest paid by chartered banks on savings deposits and deposit receipts. The change, effective June 1, reduces the rate from two to  $\frac{1}{2}$  per cent. The statement follows:

The chartered banks announce that owing to the present low interest yields on Dominion treasury bills and other government securities, to the continued lack of demand for commercial loans, and to the increased burden of taxation, it is necessary in the rate of interest paid on savings deposits and deposit receipts, and that the change will become effective June 1 next.

## Arabs Still Hostile

### Spread Of Anti-Jewish Feeling Feared In Palestine

Jerusalem.—The discovery of another Jew's body in the old quarter of the Holy City raised the recent toll of racial murders here to five as heavy British patrols stood guard over the Jewish quarter and held highway to prevent sabotage.

All convoys were escorted by troop contingents in military trucks. Roads leading from Jerusalem to Jaffa were similarly protected.

An attack by 1,000 Arabs on the funeral of Karl Briettiger, a slain Christian, led authorities to fear Arab anti-Jewish feeling was spreading to include all foreigners in Palestine.

The Arabs invaded the Catholic cemetery where the burial service was in progress, seized the coffin from the burial party, and held it until the arrival of a police squad, when they abandoned it and fled.

## Will Ruin Voices

### Says Baritone Classes For Young Voices Should Not Be Allowed

Calgary.—Tenor and baritone classes for singers under 19 years of age should not be allowed, declared Arthur Crammer, of London, England, adjudicator at the Alberta musical festival here.

"It is wrong that these young men should be singing these songs at their age. They will ruin their voices," the adjudicator said. "There were so few good singers that it was a pity to spoil the ones who did possess good voices."

### Relief Works In Quebec

Montreal.—A program of relief works will be substituted for cash relief in Quebec province effective June 1. Municipal Affairs Minister Bouchard announced. Jobless will be absorbed as relief projects get underway.

## National Film Society

### A Permanent National Executive Is Appointed

Ottawa.—The National Film Society of Canada, organized last year to promote study, appreciation and use of motion and sound pictures as educational and cultural factors in Canada, announced appointment of a permanent national executive and disclosed that Lord Tweedsmuir had consented to be honorary president.

Executive officers are:

President, Sydney Smith, president of the University of Manitoba; vice-presidents, Charles G. Cowan and Mr. Justice T. Rinfret, both of Ottawa; secretary-treasurer, Donald W. Buchanan, Ottawa. Among the directors are: E. A. Corbett, Edmonton, and Dr. D. O. Evans of Vancouver.

The society now has branches in Montreal, Ottawa, Toronto and Vancouver.

Ottawa.—The society has branches in Montreal, Ottawa, Toronto and Vancouver.

## STUDY LETHAL GAS CHAMBER METHOD OF EXECUTIONS

### League Is Advised That Japan Is Shipping Drugs To Canada

Ottawa.—A parliamentary committee will be established next session to consider the advisability of substituting a lethal gas chamber for hanging in murder cases. Hon. Ernest Lapointe, minister of justice, advised the House of Commons.

Discussing the Blair bill to make the change now, the minister said he had reports from five American states where the gas chamber has been used indicating it was more humane and less costly than hanging.

Reports from the United States and Canadian governments prove the existence in those countries of organized rings importing narcotics from Japan, the committee was told.

The reports included the name and address of the principal Japanese source of supply and correspondence in which the Japanese merchant allegedly informed his American and Canadian customers how to smuggle the narcotics into their countries.

The Tokyo government has been supplied with complete details of the illicit traffic, the reports said.

The Canadian government indicated the narcotics seized in Canada during 1935 were slightly less than in the previous year. A total of 163 persons were convicted on narcotic charges last year compared to 226 in 1934, the report said. Of the persons convicted, 69 were deported as undesirable aliens after serving prison sentences.

The minister made his announcement as a climax to a short but stormy discussion of crude oil duties and the gasoline industry as a whole.

He said the majority of skimming plants in the west had been guilty of defrauding the government of customs duties in the past and already had paid over \$50,000 in penalties.

With the exception of a few owned by farmers, the skimming plants of the west were a "racket" and, judging from profits, a financial gold mine.

The industry is dominated by a gasoline millionaire, Gordon Ross (Lbb, Moose Jaw) who said when he started the discussion.

United States companies in the Canadian field charged higher prices than in American markets.

Prompted by a change in gasoline duties, the Saskatchewan member predicted the big refineries would attempt to raise freight rates on high-grade crude and put small skimming plants out of business.

Mr. Ross said he had no particular objection to the budget change in petroleum tariffs. It placed a one-half cent duty on high-grade crude and was aimed at crude or gasoline which is "exported" by a small percentage of crude oil.

Small skimming plants used the high-grade crude and could be put out of business by freight increase applications to the railway board.

"If any such thing is done, then I or some other person will go to the board and ask for a reduction on freight rates on all petroleum products, at least in western Canada," he declared.

Mr. Ross quoted figures to show gasoline could be imported at Halifax or Vancouver, all duties and freight and handling charges paid and sold below current prices.

T. C. Douglas (C.C.P., Weyburn) moved the change the government was trying to force the small skimming plants out of business from the removal of high-grade crude from the free list. The tariff change was "the hand of the government but the voice of the big oil companies" and he moved to replace high-grade oil on the free list. This motion eventually was ruled out of order by Deputy Speaker Sanderson.

This charge was resented by the finance minister who indignantly denied he was acting as an agent for the big oil companies.

Many of the skimming plants were started by farmers and small business men in the west, Mr. Dunning said, but at later were sold to a holding company known as Petroleum Securities, Limited. To his knowledge this was the most profitable business in Canada.

The one-half-cent duty will not put any honest farming plant out of business, Mr. Dunning said, but it "will absolutely end the business of bringing in doctored crude oil or spiked crude."

## SEEKS LEADERSHIP

### Plans For Settlement Of British Families In Manitoba

Winnipeg.—Representatives of the Empire Migration Settlement group have asked the Manitoba government for an appointment to discuss settlement plans it was announced at Manitoba government offices.

Word from London said the group were informed the Manitoba legislature supports plans for settlement of British families here. P. O. Schonegger, chairman of the group, is on his way to Manitoba in connection with the scheme.

## Empire Migration

### TARIFF BOARD TO KEEP WATCH ON THE PRICE OF GAS

Ottawa.—The tariff board will be instructed to maintain a watching brief over the gasoline industry in the light of tariff changes announced in the budget, and particularly to keep track of price changes, Finance Minister C. A. Dunn told the House of Commons.

"I propose to ask the tariff board," he said, "to keep in touch with developments which follow the changes in duty proposed in the petroleum schedules and particularly to keep informed as to the price situation and as to the performance of the major companies in rectifying the uneconomic conditions of distribution and to study the relation of railway and other transportation to the petroleum industry."

"The changes proposed in the present (petroleum) schedules seem to call for price adjustments in all parts of Canada excepting possibly the populous parts of Quebec and Ontario. If the results which we anticipate do not show that we will expect to be able to obtain the information required by the (tariff) board to come to proper conclusions as to the course which should be pursued."

The minister made his announcement as a climax to a short but stormy discussion of crude oil duties and the gasoline industry as a whole.

He said the majority of skimming plants in the west had been guilty of defrauding the government of customs duties in the past and already had paid over \$50,000 in penalties.

With the exception of a few owned by farmers, the skimming plants of the west were a "racket" and, judging from profits, a financial gold mine.

The industry is dominated by a gasoline millionaire, Gordon Ross (Lbb, Moose Jaw) who said when he started the discussion.

United States companies in the Canadian field charged higher prices than in American markets.

Prompted by a change in gasoline duties, the Saskatchewan member predicted the big refineries would attempt to raise freight rates on all petroleum products, at least in western Canada," he declared.

Mr. Ross quoted figures to show gasoline could be imported at Halifax or Vancouver, all duties and freight and handling charges paid and sold below current prices.

T. C. Douglas (C.C.P., Weyburn) moved the change the government was trying to force the small skimming plants out of business from the removal of high-grade crude from the free list. The tariff change was "the hand of the government but the voice of the big oil companies" and he moved to replace high-grade oil on the free list. This motion eventually was ruled out of order by Deputy Speaker Sanderson.

This charge was resented by the finance minister who indignantly denied he was acting as an agent for the big oil companies.

Many of the skimming plants were started by farmers and small business men in the west, Mr. Dunning said, but at later were sold to a holding company known as Petroleum Securities, Limited. To his knowledge this was the most profitable business in Canada.

The one-half-cent duty will not put any honest farming plant out of business, Mr. Dunning said, but it "will absolutely end the business of bringing in doctored crude oil or spiked crude."

## WANT LEGATION GUARDS OUT OF ADDIS ABABA

London.—An authoritative source said the British and French governments have been in consultation following Italian "hints" that their legation guards in Addis Ababa should be withdrawn. The two governments, it was said, are seeking to determine what course they should pursue.

The Italian government has been in control of the situation in the Ethiopian capital and able to maintain safety for foreigners. Legation guards were considered superfluous.

The British and French have been studying whether the conditions in Addis Ababa can be considered safe.

The British have made it clear that, even should they withdraw their legation, they would consider the step to be taken without political implications as regards the recognition of Italian sovereignty over Ethiopia.

Meanwhile, the British have ordered searching inquiries into the mysterious disappearance of L. J. Bonner, a nursing orderly attached to the British ambulance unit in Ethiopia.

France refused to withdraw its troops from Diredawa, a key point on the Italian-occupied Franco-Ethiopian railroad. Official French sources said the 150 colonials would continue to guard the Diredawa shops on the French-owned railroad, despite a request from Italy that they withdraw.

Railroad officials also declined an Italian request that they permit the shipment of \$40 tons of provisions from Djibouti, French Somaliland, to the Fascist troops in Addis Ababa. The request was turned down on the ground that the road's war-time neutrality still is in force.

## Empire Air Service

Move Is Made By British Government To Speed Up Schedules London.—The House of Commons passed a financial resolution dealing with long-term subsidies for the empire's air routes. The vote was 259 to 122.

"If our proposals mature," said Sir Philip Sassoon, under-secretary for air, in introducing the resolution, "Britain will get record value for her money." He said the scheme was designed to provide for an increasing acceleration of schedules; an increase in the frequency of the services and the carriage of all first-class air mail at the rate of three halfpence (three cents) per ounce.

Imperial Airways Sir Philip told the house, was aiming at a 2½-day schedule to West Africa, 4½ days to South Africa, six to seven days to Australia, 2½ days to India and 4½ to Singapore. He said the South African and Singapore services already had been duplicated.

## Warlike Spirit

### W.H. Intensity Moves To Make Italy Self-Sufficient

Rome.—The directorate of the Fascist party decided to "intensify" moves to make Italy self-sufficient through "permanent and irrevocable" exclusion of products from countries which participated in the League of Nations' sanctions, but the moves were not defined.

The directorate also ordered all able-bodied Fascists between 21 and 50 years of age to submit requests to enroll in the Blackshirt militia to demonstrate their "solidarity with the party's warlike spirit."

**Candidate For By-Election**  
Victoria.—Former Premier S. F. Tolmie has accepted the invitation of the Victoria Conservative Association to contest the Victoria federal by-election June 8. The Liberal and Co-operative Commonwealth Federation parties, who will contest the by-election, have yet to announce their candidates.

**Finding Jobs On Farms**  
Toronto.—More than 2,000 men have been taken from relief rolls of Ontario municipalities and placed on farms, Hon. David A. Croll, minister of welfare, said. Before the summer is over the department expects to find 15,000 jobs, Mr. Croll said.

**German Cruiser Leaves**  
Montreal.—The German cruiser Emden slid out of her berth at Laurier Pier, and started down the St. Lawrence River, en route to Spain, on the last leg of a world cruise after a six-day stay in Montreal waters.

*Ether Waves*  
By Gunnar

Dear will be glad to answer your Radio Questions. Address him in care of the Chronicle.

Radio interference and its elimination is a subject in which every radio listener is or should be interested. Nothing can do more to ruin our enjoyment of radio entertainment than to have a good programme interrupted by interference, or for us to be unable to receive some regularly broadcast feature because of noise and man-made static.

The following article on Radio Interference prepared by the Radio Manufacturers Association is so complete that although too long to include in one issue, it would be spoilt by any attempt on my part to condense it. It will therefore be continued through several issues and those readers who are desirous of saving this article for future reference may clip each issue as published. When completed they will have a very thorough discussion of this very interesting subject.

**Radio Interference**

The satisfactory reception of a radio programme involves the radio broadcasting station, the radio receiver, and the space between broadcast station and the receiver. Programmes may be considered as originating at the broadcast studio where they are sent on to the broadcasting station. At the broadcast station the small energy which is received from the microphone is amplified, or built up, many times, and then sent from the broadcast station antenna out into space as radio waves. These waves are relatively strong close-by the broadcast station, but as they travel out into Space they are gradually weakened until they become so faint as to essentially disappear entirely. The next step is the pick-up by the receiving antenna of these waves. The receiving set in turn amplifies or builds up the small amount of radio energy which it receives, and then converts this electrical energy back into sound which is heard from the loud-speaker. The weaker radio waves require much greater building up, or amplifying, by the receiver.

Midget Ball

A return friendly game was played with Carstairs on Friday night at Carstairs. Our boys were again too good for the northern bunch, even though they had bigger lads and won out by 13 to 7. The high-lites of the game were in the 3rd, 5th, and 6th innings. In the third, after Sharp had allowed two singles and a wildpitch, he struck out the next three batters to retire the side.

In the fifth with two on and one out, Mickey McMillan made a splendid catch in deep left field, running back to make it. Wheeling it in fast, got the runner off third and retired the side.

Sooty Russell practically repeated this mark in the sixth, when he made a great catch in deep right field with the bases loaded but the runners, made the return to their bases safely.

Carstairs Pitcher, Edmiston, struck out three men in the 5th.

Doug Hall Umpired the game to everyone's satisfaction.

Merie Jones and Doug Hall supplied the transportation.

# Romantic History of Mining In Canada From Early Days Forms An Engaging Chapter

The discovery of great wealth hidden in the rocks of Canada has been a story of exciting thrills, a story of romance often mixed with tragedy. Dr. Charles Camell remarked to the Canadian Club, and he indicated that the romance was far from ended. Mining on this part of the continent began with the extraction and utilization of copper ore by the Indians on the north shore of Lake Superior and along the Coppermine River near the Arctic Sea. But the first real interest in mining in what's now Canada came with the discovery of placer gold in the Fraser River and in the Caribou district before British Columbia came into Confederation.

Then came the accidental discovery at Salmon of the greatest mixed deposits in the world, when the Canadian Pacific Railway was built in 1885. Next, the rush to the Klondike in 1897 and the production of \$100,000,000 worth of gold from the streams of the Yukon in a few years, which turned the eyes of the world to Canada. But hundreds of prospectors lost their lives in the great adventure.

Another new chapter began with the accidental discovery of exceedingly rich silver deposits at Cobalt when the Temiskaming and Northern Ontario Railway was built in 1902. The valuable experience gained by prospectors, mining engineers and geologists in this district was successfully applied to exploration work all through the northern mining areas of Ontario and Quebec and led to the rapid development of gold production.

Dr. Camell pointed out that there has been the romance of metallurgy as well as the romance of finding Nature's hidden treasures. Miracles were wrought in the successful treatment of ores by the scientific development of new metallurgical processes.

This was true of the Flin Flon mine, the great Sullivan mine in British Columbia, and the rich mines of the Sudbury district.

The romantic area is far flung, reaching up to the Great Bear Lake, where the richest radium-bearing ore in the world is found, the copper deposits at the Copper River mine on the northwestern coast of Hudson Bay, and to various northern points in the Western Provinces where gold deposits have been located.

In one of the greatest times of trouble in the history of the country—the years of the great depression—more help came from mining than from anything else. And the prospect is that, in the years to come, still greater progress will be made in unlocking the mineral wealth of Canada, the extent of which can be only guessed, though it is evidently very great. And the continuing romance will indirectly confer great benefit on the whole country and contribute to the welfare of its people—Winnipeg Free Press.

## Urge Northern Highway

Suggest Road From Winnipeg, Through Saskatoon To Jasper

An all-weather highway over the "ever-green" route" running from Winnipeg via Riding Mountain National Park and through Saskatoon to Jasper and speedily connecting all the Canadian cities tour was urged by the National Parks Highway Association when 30 delegates and members representing the prairie provinces and British Columbia passed a resolution to be forwarded to provincial governments and the federal government during the course of a general meeting at Saskatoon.

C. H. Grant, K.C., of Edmonton, was elected president to succeed A. H. F. Stalik, formerly of Dauphin, and Frank Barnhouse of Edmonton, was made secretary in place of C. D. Bates, of Dauphin.

## Staff Resignations

Three staff resignations were announced by Dr. R. C. Wallace, president of the University of Alberta, in making his annual report at convocation in Edmonton. Associate Professor Joseph Flanagan of the department of English goes to Victoria College, Toronto. Dr. A. Lydon of the department of soils, will join the Dominion service, while Dr. Emerson Smith leaves to take up practice at Saskatoon.

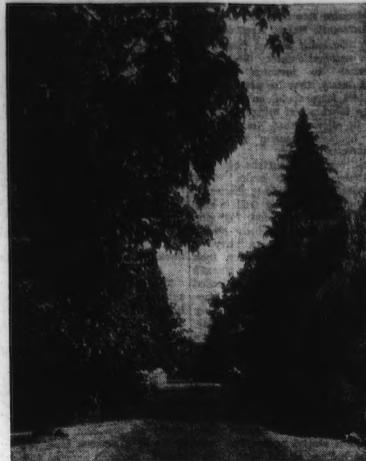

## Likes English Schools

A scheme to establish a public school in Egypt on the lines of Eton and Harrow is being sponsored by the Egyptian Prime Minister, Aly Maher Pasha. English masters will be engaged to organize the school, and a maximum of 240 students will be allowed to enrol, according to present plans. One quarter of the students will be scholarship boys, the rest the sons of wealthy families.

Dear antlers are composed, internally, of the same material as that which forms the hair.

Germany is selling a large number of commercial aeroplanes in the Far East.

TREE-SHADED HIGHWAY AT VICTORIA, B.C.

There are over a thousand miles of good motor roads on Vancouver Island. In places, these roads run along by the sea shore; at other times they climb up to spectacular views from the hills, then they take the visitor down into the scenic valleys, famous for their dairy farms. Always with you as you drive along the Island highways you have trees, Douglas Fir, Balsam, Dogwood, Cedar, Maple Spruce, Alder, Willow, Oak, now one kind, now another, but always trees and mostly evergreen.

## Possible Cure For Epilepsy

Brain Surgery May Be Used Through New Discovery

More Charitable To Feed Chinese Than Destroy Food

In a province in China there are

anywhere from one million to ten million people on the verge of starvation.

In Brazil they are burning coffee because there is too much of it. In the United States cotton has been plowed under and millions of pigs have been destroyed because there is too much bacon and pork. In some other countries beef animals have been destroyed to reduce the surplus in Canada and the United States we have had for several years a surplus of wheat causing us grave anxieties.

In China a million people, to take the lowest estimate, are dying of starvation.

There is no world management. If the world could feed China in her year of disaster no doubt China could repair the world in her years of plenty.

Surely the western world might better bestow in charity her surplus foods on starving China than destroy them by fire or the plow or cast them into the sea—Toronto Daily Star.

There is no world management. If the world could feed China in her year of disaster no doubt China could repair the world in her years of plenty.

This place now appears to be the "frontal lobe," a section of gray matter in the forward part of the brain which can be safely removed by surgery. It has been demonstrated that removal of this area does not seriously affect the mind.

In certain cases the electrical clues picked up at Harvard all come from this frontal lobe. But it is not yet sure that epilepsy comes solely from this area. It might originate deep down in the brain and merely affect the frontal lobe as the delivery depot.

In that case the medical men were informed surgery on the forward part of the brain would not be expected to help. The epilepsy studies were reported by William G. Lennox, Fred A. Gibbs and Erna L. Gibbs of Boston.

## Used More Sugar

Canada's consumption of sugar last year amounted to 981,109,960 pounds of butter and 39,572,341 pounds of cheese per head of population in 1935 when 338,896,970 pounds of cheese were disposed of. In 1934 the consumption of butter was 338,824,894 pounds, or a per capita consumption of 31.12 pounds. Between 1933 and 1934 there was an increase amounting to almost a pound per head, but the 1935 figure is just about three-quarters of a pound above the 1933 figure, and less than one-half pound above the 1932 estimate. In other words, the average run of consumption of butter is over 30 pounds per head of population.

The consumption of cheese in Canada in 1935 is estimated at 39,572,341 pounds, or 3.61 pounds per head of population. This is practically the same per capita figure as in 1934, but compared with 1933 shows a small increase of 0.22 pound, and an increase of 0.36 pound compared with 1932.

## Remove Gold From Shoes

Gold miners in the Rand district of South Africa have been ordered to clean their boots before leaving the shift. The mud belongs to the company. An official recently collected several buckets of mud scraped from miners' footwear and had it assayed. He recovered \$350 worth of gold.

It is even worse with the leaders and awakers themselves. Judging by the numbers of speeches and army reviews they must be dead on their feet from lack of sleep. That must be why they are always talking at innocent bystanders—New York Times.

It is even worse with the leaders and awakers themselves. Judging by the numbers of speeches and army reviews they must be dead on their feet from lack of sleep. That must be why they are always talking at innocent bystanders—New York Times.

if Quaker Corn Flakes  
are not the best, most  
delicious corn flakes  
you ever tasted.

## QUAKER CORN FLAKES

### FLEMING'S FOLLY

BY LAWRENCE A. KEATING

#### SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation plan.

The meeting terminates, but Buzz Hamilton and his side-kick, Roper Kilgo, still hang around. Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence the cattlemen. The meeting is adjourned, and the stormy meeting Fleming is uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Buzz Hamilton arrives back in Rawhide while Fleming and Helen are in the bank getting a loan for payment of wages for work on the dam. Roper Kilgo and James Moll meet him and he goes into the saloon with them. By the time his sister and Link come from the bank, Buzz and Roper are drunk. Roper has distorted the facts concerning the dam proposal to Buzz, making it appear that it was to be a dam to store water for irrigation.

Buzz, infuriated with liquor and anger, tries to throttle Fleming, but is thrown to the floor. Then Helen appears, and when she is about to be robbed of the \$800 they had obtained from the bank.

On their arrival home, they were not by a chance of Link's working with Roper. They thought that was a strike at the dam, and that the men were afraid they would not get their wages. Link told them of the robbery, and informed them to get away as soon as possible. The men reluctantly returned to work.

Fleming goes to Roper and Jackpot Mill, asking him to give him the power to manage the Triple H. He argues that responsibility would be the best way to help him to get back his job at the point of his gun. Both Roper and Kilgo swear revenge, and tell Fleming to carry his gun with him, as Moll would shoot him the next time they met.

Buzz Hamilton goes to Fleming and asks for power to manage the given him to manage the Triple H. He argues that responsibility would be the best way to help him to get back his job at the point of his gun. Both Roper and Kilgo swear revenge, and tell Fleming to carry his gun with him, as Moll would shoot him the next time they met.

"Oh-hello, Link."

If her welcome lacked its usual warmth he did not notice as he took in the loveliness of her, the rose pale texture of her complexion, the large eyes and the glinting halo of wavy hair. He moved nearer to take her small hands while his eyes roved again over her head and shoulders. "Say, this is pretty hard on a young fellow. Maybe you know that already, eh?"

She looked away as if ill at ease. "It's nice of you to say that."

Fleming had utterly forgotten his errand; he could think of nothing but the vision of beauty before him. His sun-darkened eyes betrayed his thoughts as he leaned, downward with hope high in his face. But her small hands pushed against his chest and she sought to free herself. Quickly abashed, he released her, and they stood silent a moment, avoiding each other's eyes.

"Gosh, I'm sorry. Reckon I oughtn't to've done that."

Still she said nothing. "You look kind of pale. You aren't ill, Helen?"

I'VE TEAMED UP WITH QUAKER AGAIN, TO MAKE THOUSANDS OF BOYS AND GIRLS HAPPY WITH THE SWELL BASEBALL GIFTS SHOWN HERE, YOU CAN GET THEM FREE WITH BOX TOPS FROM QUAKER CORN FLAKES. SEND ME THE COUPON BELOW, QUICK!

● Boy! Are Quaker Corn Flakes good! Believe me, you'll want them for breakfast, for lunch, for supper and every time you can get them. Try some. They taste great! They're full of health-giving

energy that helps to give you strength and stamina you need in baseball and other sports. Take a tip from me and eat Quaker Corn Flakes regularly . . . you'll like them.
